

RISK FACTORS

Prior to making any decision regarding your execution of the Opt-In Agreement and acceptance of Dream Bowl 2026 Meme Coin tokens (such tokens, the “Meme Coins”), you should carefully consider the following Risk Factors. If any of the events discussed in the Risk Factors occur, the value of the Meme Coins you receive could be adversely affected.

The value of the Meme Coins may increase or decrease between the Record Date and the Payment Date and/or at any time following the Payment Date. The value of such coins may also be highly volatile.

The Distribution will be in the form of a digital asset, the Meme Coin. If the value of the Meme Coins decreases between the Record Date and the Payment Date, participating holders may receive less value than initially expected by those who elected to receive the Distribution. Additionally, the value of the Meme Coin may decrease after the Payment Date. Once you have made the Election, it is irrevocable. Datavault will not be responsible for any decrease in the value of the Meme Coins.

In addition, digital assets, such as the Meme Coin, generally are highly volatile assets and do not pay interest or other returns, and so the ability to generate a return on the Meme Coins will depend on whether there is appreciation in the value of digital assets.

The irreversibility of digital asset transactions exposes you to risks of theft, loss and human error, which could negatively impact your rights to the Distribution.

Once a transaction has been verified and recorded in a block that is added to the blockchain, an incorrect transfer of digital assets or a theft of digital assets generally will not be reversible, and you may not be capable of seeking compensation for any such transfer or theft. If you provide Datavault with the wrong wallet address (which is a valid address), the owner of such wallet address will receive the benefit of your Meme Coin Distribution, and you will receive nothing. Datavault will be unable to revert or otherwise recover the impacted digital assets and will not be responsible for any loss. If you provide Datavault with an invalid wallet address and the transfer is rejected by the Datavault network, Datavault may, at its option, refuse or reasonably delay payment of the Distribution. You are encouraged to confirm your wallet address prior to submitting your Election.

Meme Coins and other digital assets are novel assets and are subject to significant legal, commercial, regulatory and technical uncertainty.

The Meme Coins and other digital assets are relatively novel and are subject to significant legal, commercial, regulatory and technical uncertainty, which could adversely impact their price. The application of state and federal securities laws and other laws and regulations to digital assets is unclear in certain respects, and it is possible that regulators in the United States or foreign countries may interpret or apply existing laws and regulations in a manner that adversely affects the price of the Meme Coin. Regulators in the United States or foreign countries may also enact new laws and regulations, or pursue regulatory, legislative, enforcement or judicial actions, that could materially impact the price of the Meme Coins or the ability of individuals or institutions to own or transfer Meme Coins.

The growth of the digital assets industry in general, and the use and acceptance of the Meme Coin in particular, may also impact the price of the Meme Coins and is subject to a high degree of uncertainty. The pace of worldwide growth in the adoption and use of the Meme Coin may depend, for instance, on public familiarity with digital assets, ease of buying, accessing or gaining exposure to the Meme Coin, institutional demand for the Meme Coin as an investment asset, the participation of traditional financial institutions in the digital assets industry, consumer demand for the Meme Coin as a means of payment, and the availability and popularity of alternatives to the Meme Coin. Even if growth in Meme Coin adoption occurs in the near or medium term, there is no assurance that Meme Coin usage will continue to grow over the long term.

Because the Meme Coin has no physical existence beyond the record of transactions on the Meme Coin blockchain, a variety of technical factors related to the Meme Coin blockchain could also impact the price of Meme Coins. The liquidity of the Meme Coins may also be reduced, and damage to the public perception of the Meme Coin may occur, if financial institutions were to deny or limit banking services to businesses that hold the Meme Coins,

provide Meme Coin-related services or accept the Meme Coin as payment, which could also decrease the price of the Meme Coins.

The liquidity of the Meme Coin may also be impacted to the extent that changes in applicable laws and regulatory requirements negatively impact the ability of exchanges and trading venues to provide services for the Meme Coin.

The lack of legal recourse and insurance for digital assets increases the risk of total loss in the event of theft or destruction.

Digital assets, including the Meme Coins, will generally not be insured against theft, loss or destruction. If an event occurs where you lose your Meme Coins, whether due to cyberattacks, fraud or other malicious activities, you may not have any viable legal recourse or ability to recover the lost assets. Unlike funds held in insured banking institutions, digital assets are not protected by the Federal Deposit Insurance Corporation or the Securities Investor Protection Corporation. If your digital assets, including Meme Coins, are lost under circumstances that render another party liable, there is no guarantee that the responsible party will have the financial resources to compensate you. As a result, you could face financial losses.

Cryptocurrency holdings are less liquid than cash and cash equivalents and may not be able to serve as a source of liquidity for you to the same extent as cash and cash equivalents.

Historically, the crypto markets have been characterized by significant volatility in price, limited liquidity and trading volumes compared to sovereign currencies markets, relative anonymity, a developing regulatory landscape, potential susceptibility to market abuse and manipulation, compliance and internal control failures at exchanges, and various other risks inherent in its entirely electronic, virtual form and decentralized network. During times of market instability, you may not be able to sell your cryptocurrency at favorable prices or at all.

Further, cryptocurrency, such as the Meme Coin, does not enjoy the same protections as are available to cash or securities deposited with or transacted by institutions subject to regulation by the Federal Deposit Insurance Corporation or the Securities Investor Protection Corporation. You could be unable to sell Meme Coins or have to sell Meme Coins at a significant loss.

Meme Coins do not pay interest or dividends.

Meme Coins do not pay interest or other returns, and you may only be able to generate cash from Meme Coins if you sell your Meme Coins or implement strategies to create income streams or otherwise generate cash by using your Meme Coin holdings. Even if you pursue any such strategies, you may be unable to create income streams or otherwise generate cash from Meme Coins, and any such strategies may subject you to additional risks.

If we or our third-party service providers experience a security breach or cyberattack and unauthorized parties obtain access to your Meme Coins, or if your private keys are lost or destroyed or other similar circumstances or events occur, you may lose some or all of your Meme Coins.

Security breaches and cyberattacks are of particular concern with respect to cryptocurrency, including Meme Coins. Blockchain-based cryptocurrencies and the entities that provide services to participants in the cryptocurrency ecosystem have been, and may in the future be, subject to security breaches, cyberattacks, or other malicious activities. A successful security breach or cyberattack could result in a partial or total loss of your cryptocurrency in a manner that may not be covered by insurance or the liability provisions of the custody agreements with the custodians who hold your cryptocurrency.
